

Pretrip/Post-trip Inspection - Type 20 Vehicles contd.

9. At Driver's Door Check

- Fire extinguisher (present), charge level (in green) and expiration date on extinguisher.
- Safety reflectors/triangles (shake box).
- Driver's seat operation (adjust while sitting in it).
- Seat belt operation.
- Close door and check mirror adjustments.
- Turn signals (with key turned to accessory).
- Washer spray and wipers (on/off).
- Headlight bright adjustment by reflection or buddy system (then turn off headlights).
- Dome light and auxiliary fan.
- Defrost fan on high (turn selector to defrost).
- Turn on camera monitor (if so equipped).
- Engine operation (start with foot on brake).
- Steering wheel for excessive play.
- Fuel, battery, and oil pressure gauges (needle to center).
- Listen for abnormal engine noises.
- Parking brake (with foot on brake, shift to Drive, tap horn 1 time, remove foot from brake, accelerate slightly).
- Foot brake (with foot on brake, release parking brake, tap horn 1 time, lift foot from brake and roll forward approximately 2 feet, test foot brake).
- Foot brake again (with foot on brake, shift to Reverse, tap horn 2 times, scan all mirrors and camera (if applicable), lift foot from brake and roll backwards into space, test foot brake and brake lights (by reflection or buddy system), shift to Park, apply Parking Brake, turn off ignition, remove key, and release seat belt).
- Bulkhead door/lock operation.
- Paperwork (insurance card, Haz and Vehicle registration, *Response Guidebook*, DOT exception letter for bumped DG).
- VIR (Pretrip) - Check off each item needing maintenance work, sign to verify Pretrip Inspection conducted, and legibly enter your employee number.

-
- VIR (Post-trip) - Check off each item needing maintenance work or check box indicating the vehicle is serviceable, sign/date to verify Post-trip Inspection conducted, and legibly enter your employee number.
